

OnBase® Users Implementing Imager Technology

OnBase® users rely on Imager F2F™ to convert a variety of electronic documents to TIFF or PDF for archiving in OnBase®. While these documents may be generated by a variety of business groups across multiple functional responsibilities, each is converted to a TIFF or PDF image of the highest quality to ensure optimal archiving and retrieval in OnBase®.

Why integrate Imager F2F™ with OnBase®?

Imager F2F™ has been developed with OnBase® users in mind in order to deliver a solution that addresses their specific needs. In doing this, we believe that the following are the primary benefits of Imager F2F™:

Ease of Integration and Use with OnBase®–

OnBase® users who have licensed Imager F2F™ are emphatic that its ease of integration and use were the two biggest reasons they chose this solution.

Reliability – Imager F2F™ is based on Imager's core document conversion technology that has

been rigorously tested by many of the world's leading technology companies and is considered to be the most reliable document conversion technology in the world.

Customization – Imager F2F™ can be customized to meet the specified needs of any OnBase® user.

Compatible File Formats – Imager F2F™ supports any file format, including Word®, Excel®, PowerPoint® and many more.

Speed and Imager Quality – The design of Imager F2F™ and its use of Imager's core conversion technology allow for rapid document conversion to create image files of superior quality.

Support – Imager fully supports Imager F2F™ and can provide complete support to customers who expect superior service.

About Imager

Imager is a Division of Metasoft Systems Inc. (Metasoft) which is a Branham Top 100 Private Software Company that has extensively sold image and document conversion software to many of the world's leading technology firms. Metasoft's proprietary technology has an estimated installed base of 55 million users worldwide.
